MUNICIPAL REPORTING BURDEN RESEARCH

CONTEXT

RESEARCH DESIGN

Objective: to help us better understand and quantify the impacts of provincial reporting obligations faced by Ontario municipalities, and identify recommendations to streamline reporting requirements that will benefit municipal governments and maintain accountability, where necessary.

Timeline: June 1st, 2016 - August 31, 2016 (3 months)

Guiding Questions:

- How do municipalities report to the province?
- How do these existing reporting requirements impact different municipalities?
- What regulatory mechanisms/supports/changes have/will lead to improved municipal reporting?

RESEARCH METHODOLOGY

- I: Conduct case study research with local governments across Ontario (Summer 2016)
 - Online survey (17 questions)
 - List of Reporting Requirements
 - Interviews/Focus Groups
- II: Conduct general research with individual local government staff across Ontario (July 2016)
 - Online survey (34 questions)
 - Responses came from a diverse range of municipalities, including:
 - Small, medium, large
 - Single, upper and lower tier
 - Municipalities in all regions of the province

POLICY OPTIONS

For the Province

1. Establish and maintain a comprehensive list of provincially required reporting for municipalities
2. Recognize the burden and open discussions on reforming the regulatory and reporting policy for Ontario's municipalities
3. Engage in greater provincial-municipal discussion on municipal reporting for the purposes of greater data utility
4. Communicate the purpose, value and use of required reporting and data
5. Consider varying reporting requirements for municipalities based on set criteria
6. Explore reporting best practices via technology/ centralized database / single data collection

POLICY OPTIONS

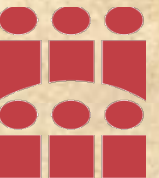

For Municipalities

1. Strive to understand your municipalities reporting obligations and practices
2. Devise organizational planning strategies for reporting obligations
3. Develop data management approaches to improve quantitative records and optimize qualitative inputs within reporting requirements
