

# INNOVATION ENERGY

## Morning: Oxygen Poker

- Based on our Beyond Engagement philosophy, Oxygen Poker is an experiential learning exercise that is fun and insightful. The activity leaves learners with a practical approach to managing energy to maximize performance.
- Learning outcomes:
  - Understand the 5 driving needs and the impact they have on energy in the workplace
  - Gain insight into how unmet needs generate unsavoury behaviours
  - Learn how to harmonize competing needs and understand the difference in need mix between people
  - Explore how to create an environment that maximizes energy and performance

## Afternoon: Innovation in a Box

- Innovation is a strategic capability every municipality should be considering to help improve internal and external service delivery, and to deliver the maximum value to constituents. While you no doubt recognize “why” innovation is needed, you may struggle with “how” to do it.
- In this session, we will explore how municipalities can embed innovation as a key capability by equipping individuals and teams with a structured process and practical tools they can apply everyday.
