WORKSHOP: Improving Service Delivery in Municipalities through Shared Services and Collaboration

Small rural municipalities are always scrambling to do more with less money. In March 2019, the Province of Ontario invested funds with 405 small and rural municipalities in order to help them plan, modernize and improve the way they provide services to their communities. This one-day workshop is intended to provide ideas and a forum for brainstorming on how municipalities can work together to organize shared services which will improve service delivery without increasing tax dollars.
