The Election Event Dashboard

Online Voter Services

Voter Registration

Election Worker Management/Portal

VoterView Express

Candidate Portal

Election tools available:

VoterView

an elector management system providing election officials with an electronic view of their Voters' List and the capability to make changes

Modules:

Online Voter Services

(formerly IVL)

allows electors to determine if they are on the Voters' List directly from the Municipality's website

Voter Registration

provides an option for electors to register online to have their name added to the Voters' List

Candidate Portal

allows candidates to view real-time data for eligible electors via a basic search capability

VoterView Express

(formerly Mobile)

a windows-based application that can be installed onto any laptop or desktop to support electronic voter strike-off

Election Workers

this module provides the functionality necessary to manage election workers and staffing requirements, including an online application and integrated quiz functionality

Election Event Dashboard

helps the Municipality manage and monitor in real-time all of the key activities of your electoral event and provides 2-way communication between the voting locations and the Municipal Office

'HOME' & 'Global Search'

The screenshot shows the VoterView web application interface. A red arrow points to the 'Home' link in the top navigation bar. Another red arrow points to the 'Search by keyword' input field. A third red arrow points to a dropdown menu containing 'Change Password', 'Switch to Training', and 'Logout'. A red 'NEW!' sticker is in the top right corner. The main content area is divided into two columns. The left column contains 'What's New' with three items: 'Candidate Access Portal', '1st LIVE Webinar - Mar 7, 2018', and 'Questions/Comments sent to webinars@datafix.com'. The right column contains 'Webinars' with a list of recordings and a table of 'Key Dates'. At the bottom right, there is a table for 'Data Cleansing' showing counts for various data issues. The footer contains links for 'Privacy & Security Policy' and 'Contact Us', and version/copyright information.

Training Database

The **Training Database** is a separate database and any actions performed do not affect the Production Database in any way.

The Home Page and all subsequent screens show a blue border with the words **'TRAINING'** to indicate that you are now working in the Training Database and not in the Production Database.

The screenshot shows the VoterView web application interface. The top header includes the VoterView logo, a search bar, and a dropdown menu showing 'Municipality of Oz (Training) | Penny Christie (pac)'. A red arrow points to the 'Training' label in this dropdown. Below the header is a navigation bar with links: Home, Search, Add, Record Electors, Reports, Manage, Tools, Data Cleansing, and Administration. The main content area is divided into several sections:

- What's New:** Contains announcements about 'Online Voter Services (formerly Internet Voter Lookup (IVL))', 'Join our Webinars', 'Custom Reports', and 'New Election Event Dashboard'.
- Key Dates:** Lists important dates such as 'July 27, 2018 Nomination Day', 'October 22, 2018 Election Date', and 'November 21, 2018 Revisions to MPAC'.
- Data Cleansing:** A table showing the number of records for various cleansing tasks.
- Worker Applications:** A table showing the number of new applicants, pending interviews, and hired workers.
- Vital Statistics:** A table showing key statistics like eligible electors, properties, and recorded electors.

The background of the page features a repeating 'TRAINING' watermark.

Task	Count
Duplicate Electors	154
Mailing Addresses	279
Elector Name Anomalies	61
Invalid Roll Numbers	6
Merge Conflicts	0

Category	Count
New Applicant	0
Pending Interview	1
Hired	9

Category	Count
Eligible Electors	24,204
Properties	11,958
Recorded Electors	1
Confirmed Electors	0

Data Cleansing

Helps you to identify and correct any possible errors with the Voters' List as well as maintain the data integrity of the List.

Remove duplicate electors.

Correct elector name anomalies.

Standardize your street index.

Cleanse mailing addresses according to Canada Post standards to achieve the maximum postage discount.

Change History

A complete inventory of all changes made in VoterView is maintained. The **Change History** screen displays a grid containing the most commonly requested changes.

The screenshot displays the VoterView interface for the Municipality of Oz, logged in as Penny Christie (pac). The 'Reports' menu is open, showing options like Extracts, Change History, Counts, Recorded Electors, Custom Report, Unrecorded Electors, Inventories, and Contribution Rebates. The 'Change History' sub-menu is also open, showing options like Recent Changes, Deleted Electors, Deceased Electors, Added Electors, and Change History Counts. The 'Change History' screen shows a table of changes with columns: Change Date, Name, Address, Delete Reason, Source, and User. The table lists several changes, including duplicate names and deceased electors.

Change Date	Name	Address	Delete Reason	Source	User
Feb 6, 2017 11:07 AM	COLLERAN, ELFI LILLIAM	4 V...	Duplicate Name in Voters List	VoterView Data Cleansing	Geoff Day
Feb 6, 2017 11:06 AM	GABRIELSON, MARYANN	50...	Deceased	Death Certificate	Geoff Day
Oct 26, 2016 10:07 AM	COCKSEGE, BREN BLAZE	30...	Duplicate Name in Voters List	VoterView Data Cleansing	Penny Christie
Oct 12, 2016 6:30 PM	SMITH, ALLAN	20...	Not a Canadian Citizen	In Person	Geoff Day
Jul 21, 2016 3:48 PM	GOLDIE, ASPASIA MELLISA	59 MIDDLE ST	Duplicate Name in Voters List	VoterView Data Cleansing	Geoff Day
Jul 21, 2016 3:32 PM	SMITH, JOHN	40 UNIVERSITY AVE	Deceased	Death Certificate	Geoff Day

Extracts

Extracts:

The extract facility can produce customizable elector list extracts and revision reports for on-demand printouts of elector information.

Allows you to:

Select your columns of information and the order of those columns.

Save and name extract templates for future use.

Schedule extracts to run automatically.

The screenshot shows the 'Add Template' interface in the VoterView application. The header includes the VoterView logo, a search bar, and the user 'Municipality of Oz | Penny Christie (pac)'. The navigation menu has options: Home, Search, Add, Record Electors, Reports (selected), Manage, Tools, Data Cleansing, and Administration. The breadcrumb trail is 'Home / Extracts / Add Template'. The main section is titled 'Add Template' and contains a five-step wizard: 1. Filter (active), 2. Columns, 3. Sort, 4. Additional Information, and 5. Schedule. The 'Filter' step includes several dropdown menus: Extract Type (Voters' List Only), Voting Status (All Electors), Confirmation Status (All Electors), School Support (All School Boards), Residency Status (All Electors), Institutional Status (All Electors), Personal Obscuring (All Electors), and Scope (Voting Location). At the bottom, there is a 'Location Name' input field with an 'Add Location' button, and a 'Selected Voting Locations' list containing 'Oz Town Hall' and 'Beaty Branch Library'. 'Cancel' and 'Next' buttons are at the bottom right.

Reports in Chart Format and Graphs

Most reports in VoterView can be viewed/printed in chart format or as a graph.

Example: **Recorded Electors by Channel**

VoterView
YOUR COMPLETE ELECTION SOLUTION

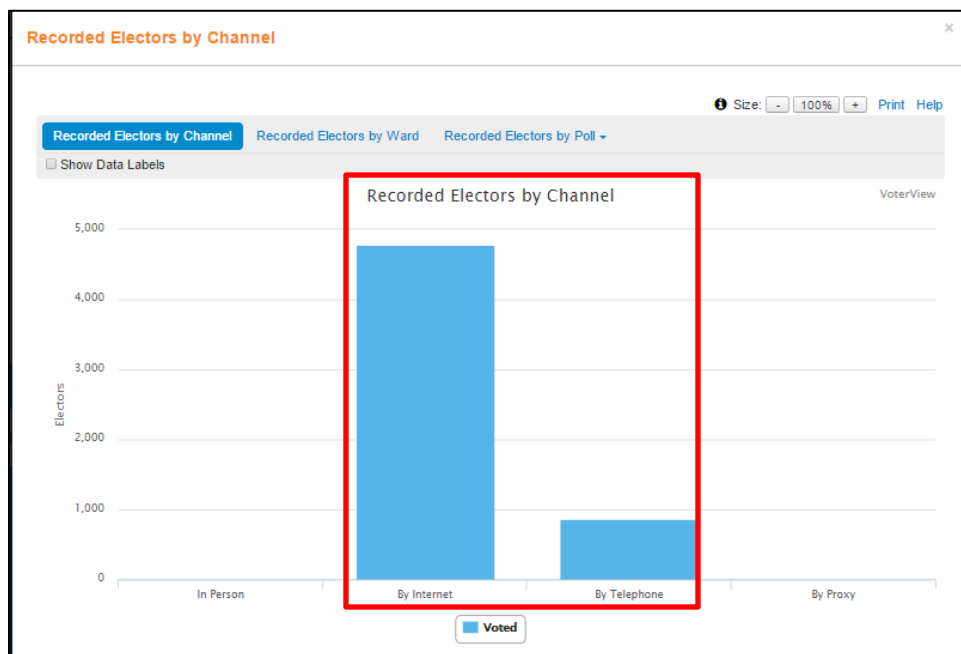

The Corporation of the City of Kenora | Penny Christie (pac) | Logout

Home Search Add Record Electors **Reports** Manage Tools Data Cleansing Administration

Home / Recorded Electors by Channel

Recorded Electors by Channel

Ward	Poll	Count	In Person	By Internet	By Telephone	By Proxy	Voted	Turnout
Ward 01		10,973	0	4,784	863	0	5,647	51.46%
Total		10,973	0	4,784	863	0	5,647	51.46%

The above chart displays the channel, the method of voting, and for this example, 4,784 electors voted **'by Internet'** and 863 electors voted **'by telephone'**.

Custom Report

NEW!

VoterView also includes a **Custom Report capability** where multivariate reports can be created. Examples of data available for analysis are, gender, residency status, school support, age, electoral district, ward/district/poll, occupancy status, voting channel and voting date/hour.

Modules

Enhancing Your Election Experience

A look at our modules and introducing our new 'Dashboard' module!

Online Voter Services

The Online Voter Services allows electors to determine if they are on the Voters' List directly from your election website as either a web service or an iframe implementation. Using the elector-supplied name and address information, the search request provides a positive or negative status indication for each request.

Provides three key functions:

1. 'Am I on the Voters' List?'

Electors enter their full name and property address and will receive either a positive or negative response. For negative responses, the voter will receive the messaging necessary to have their name added to the list. ***When the Voter Registration module is integrated with the Online Voter Services - those electors with a negative response can be directed to the online, self-serve option for having their names added to the List.***

The screenshot shows the website for the Municipality of Oz. The header includes the logo 'OZ' and navigation links: Home, Contact Us, and Advanced Search. Below the header is a search bar. The main navigation bar has four tabs: Living in Oz, Working in Oz, Visiting Oz, and Services. The 'Election Services' section is highlighted. Under 'Election Services', there is a button 'Am I on the Voters List?'. Below this button, a form asks for 'Enter your name, address and birth date below.' The form fields are: Last Name (Christie), First Name (Jackie), Street Number (111), and Street Name (Jo). A dropdown menu is open for the Street Name field, showing a list of streets: JOAN ST, JOE DALES DR, JOEL AVE, JOHNSTON ST, JOLIETTE PL, and JORDAN ST. A red arrow points to 'JOAN ST' in the dropdown. To the right of the form, there is a 'Voters' section with links: 'Am I on the Voters List?', 'Where do I Vote?', 'List of Nominated Candidates', and 'Voter Registration'. Below this is an 'Election Workers' section with a link 'Apply Online'.

Example of the fictitious Municipality of OZ!

Am I on the Voters List?

Elector enters their name and address, note the dropdown list of street names that match the letters keyed, allowing for the elector to select from the list, reducing the number of potential errors.

With a response = 'Yes', the elector can select, 'Where do I Vote?'

(for a response = 'No', see Voter Registration)

2. ‘Where do I Vote?’

Based on either a successful ‘Am I on the Voters’ List?’ search or by directly entering a property address, the ‘Where do I Vote?’ function will display the appropriate voting dates, times and locations applicable to the address entered. For customers that implement **Vote-Anywhere**, this can be configured to display the nearest voting locations to either the elector’s address or an elector-supplied postal code. In addition, Google Maps links can be displayed to show both the map of the location of the voting place as well as directions from the elector’s property to the voting location.

Voting Location	Date
Beaty Branch Library 945 FOURTH LINE	Mon Oct 15, 2018 10:00 AM to 8:00 PM
Oz Town Hall 43 BROWN	Mon Oct 15, 2018 10:00 AM to 8:00 PM
Beaty Branch Library 945 FOURTH LINE	Thu Oct 18, 2018 9:00 AM to 7:00 PM
Oz Town Hall 43 BROWN	Thu Oct 18, 2018 9:00 AM to 7:00 PM
Milton Mall 55 ONTARIO ST S	Fri Oct 19, 2018 10:00 AM to 8:00 PM
Beaty Branch Library 945 FOURTH LINE	Mon Oct 22, 2018 8:00 AM to 8:00 PM

Your voting location information is automatically pulled from VoterView; if you make a change to a location in VoterView, this will immediately be reflected in ‘Where do I Vote?’.

Note the ‘wheelchair accessible’ icon, this is an entry you’ve made in VoterView to identify which locations are wheelchair accessible.

The elector clicks the address link for a location, it will display where the Voting Location is located in relationship to their address, it also provides an option for directions from their address to the location as seen below

3. 'List of Nominated Candidates'

From #1 'Am I on the Voters' List?' or #2 'Where do I Vote?', when 'List of Nominated Candidates' is selected, this optional service provides a list of candidates applicable to the elector based on the supplied property address. Alternatively, sample ballot faces can be provided in the responses to, 'Am I on the Voters' List', or, 'Where do I Vote?' functions.

List of Nominated Candidates:

In VoterView, if you make a change to a candidate's information, it will automatically be reflected in 'Who are my Candidates?'

Voter Registration

'Am I on the Voters' List?' Response = **'No'**, the elector has chosen to register online . . .

The **Voter Registration module** extends the Online Voter Services functionality by enabling electors to **register online to have their name added to the Voters' List**. Voter Registration captures online registration requests and automatically generates pre-populated Revision Forms, for example, an EL-15, that can be printed and signed by the prospective elector and brought to their voting location.

Registration requests submitted online are available for viewing in VoterView where Election officials can process the requests in order to add, decline, or request additional information from the registrant.

Registration requests submitted online are available for review in VoterView. There, election officials with the appropriate permissions can process the requests in order to add, decline, or request additional information from the registrant.

Candidate Access Portal

With the **Candidate Access Portal** candidates can view real-time data for eligible electors in their electoral district via a basic search capability. The municipality can upload documents or forms to the candidate's portal for them to download. The Municipality has full control over which information the candidate can view, as well as, whether or not the candidate can extract a Voters' or Revision List, and how often.

The screenshot shows the 'candidateaccess' portal with a navigation bar (Search, Extracts, Revision Report, Documents, Change Password) and a 'Logout' button. The 'Elector Search' section is active, displaying a 'Search For Electors' form with fields for Last Name, First Name, Elector ID, Street Number, Street Name, Unit, Poll, and a Voted dropdown. A green 'Search' button is at the bottom right.

This is an example only, the customer decides what candidates can actually see or not and whether or not they can extract Revision Lists and if yes, how often. They have full control and decision making.

The Candidate can:

Step 1: Search for an elector name, property address or street.

Step 2: Elector Search Results – select elector to view details

Step 3: Elector details of when they voted, where and the method.

The screenshot shows the 'Elector Search Results' page with a table of electors. The table has columns for Name, Property, Ward, Poll, and Voted. The elector 'SMITH, JANE' is highlighted with a green checkmark in the 'Voted' column.

Name	Property	Ward	Poll	Voted
RUDKIN, LIVIO MARK JR	354 BALDWIN RD	04	401	
SCHINDLER, GEERT ATTILA	31 BALDWIN RD	04	401	
SCHINDLER, GROVINE MACCORQUODALE	31 BALDWIN RD	04	401	
SCHINDLER, SANDREA	31 BALDWIN RD	04	401	
SCHLEIFER, AVI TEODOR	69 BALDWIN RD	04	401	
SCHLEIFER, JORGE LEWIN	69 BALDWIN RD	04	401	
SCHLEIFER, MITCHELL MELLISA	69 BALDWIN RD	04	401	
SCHOUTEN, CASE	350 BALDWIN RD	04	401	
SCHOUTEN, VIDA	350 BALDWIN RD	04	401	
SHORNEY, DARYL	363 BALDWIN RD	04	401	
SMITH, JANE	31 BALDWIN RD	04	401	✓
SWITZER-WRIGHT, CARDER KAREEN	280 BALDWIN RD	04	401	
SWITZER-WRIGHT, EJNOR HOLDEN	280 BALDWIN RD	04	401	

The screenshot shows the 'Elector Details' page for 'SMITH, JANE'. It includes sections for Personal Information (Last Name, First Name, Middle Name), Voting Information (Voting Location, Voting Date, Voting Channel), Mailing Address, and Property Address.

Election Worker Management (and Worker Portal)

The **Election Worker Management** module accepts applications online and manages workers throughout the election cycle. This module provides all the functionality necessary to manage election workers and staffing requirements:

- Design online application and test using a “WYSIWYG” editor; automatic ‘scoring’ of the online test for review by the Municipality
- Applicant status tracking for interviews, training, and work assignments
- Allocate election workers to voting locations and confirm staffing levels at each location
- Generate export files for election worker payments
- Automated email notifications, reminders, and alerts

The Election Worker Management module also includes an **Election Worker Portal** that allows applicants to view their individual interview and training schedules and accept or decline work assignments. From their portal they can also download training materials and election documents.

Each user can **customize their own HOME screen** for Workers, Positions and Training: add columns, change the order or the columns and **create a ‘custom column’** having the information displayed on the screen.

Can select one or more electors and apply the same filter, eg., assign training, send an email, etc.

Available filters: Column filters, filters at the top of the grid, can create, name and save Custom Filters to use again.

Can ‘expand’ **Work Assignments** or **Training** to view the dates below.

	Full Name	Application Date	Email	Status	Positions	Work Assignments	Training	Ward

The Election Event 'Dashboard'

The easily customizable **Election Event Dashboard** covers in real-time all of the key activities of your electoral events and helps Election officials manage and monitor statistics in parallel to providing alerts.

During an electoral event, the **Dashboard** will display: **Real-time statistics** and alerts; **Monitor voting location** status; Highest and lowest **activity by voting location**; Current overall **vote rates**; **Potential issues** such as, voting locations not recording votes; View **turnout by ward** on a municipality map; Create, monitor, and **manage tickets**; **Monitor social media** feeds; **Tickets and Messaging** – 2-way communication between Voting Locations and the Municipal Office and **Chat**.

Screenshot view of a few of the many components available with the Dashboard:

VoterView Express

VoterView Express is a Windows-based application that includes a local copy of the Voters' List in a strongly encrypted format. When Internet connectivity is available, **VoterView Express** will continuously synchronize voting location activities, strike-offs and revisions with the back-end VoterView servers. The synchronization methodology in **VoterView Express** is two-way, activity from the local device is pushed up the back-end servers, and activity from polling locations that was uploaded to those servers is pushed down. With **VoterView Express**, voting location activities can continue uninterrupted should Internet connectivity be lost. This functionality also permits the use of **VoterView Express** at Special Voting Opportunity (SVO) locations that may not have any Internet connectivity.

Functionality is the same with Express and Record Electors in VoterView but each have a different look so the user can easily differentiate between the two and be more aware of which application they are using.
